

STANDARD SIC FURNACES

These Models are Ideal for -
General Laboratory Tests,
R & D Departments,
Machine Tools & Die Shops with high
operating temperature upto 1400°C.

LABORATORY FURNACES

Standard SIC Models are compact & sturdy, fired with high temperature Silicon-carbide heating element rod with stringent temperature accuracy.

MODEL	CLEAR INSIDE SIZE (mm)			MAX TEMP. °C	HEAT LOAD (kw)
	Width	Height	Depth		
SIC -151010	100	100	150	1400	3
SIC -301515	150	150	300	1400	6

Features :

- ❏ PID digital temp. controllers with heat input control
- ❏ Noiseless phase angle control heater firing systems
- ❏ Voltmeter, Ammeter & indicator for furnaces operation
- ❏ Separate Bench mounting or table top below the furnace control console
- ❏ Hinged/Counter weight type door operation.
